## Climate, COVID-19 and Migration Narratives in Public Discourse – Results Launch

*5<sup>th</sup> July 2024, 11:00-13:00 CET*

*– Online Event –*

Climate, COVID-19 and migration are multifaceted and complex topics that are continuously influenced by countless factors. Shaped by diverse perspectives, debates on these three phenomena are intricate and often polarised. As public discussions are becoming growingly divided, bridging polarised narratives becomes essential to build a more resilient and informed community. This session will disclose the scientific findings and narrative analysis of the NODES project on climate, Covid-19 and migration in relation to disinformation. The event will introduce narrative bridges promoting constructive dialogues acknowledging the nuances of perceptions and the common patterns between all three debates.

Duration: 2 hours
